

April 22, 2022

Fleet Services Customers,

We are aware that the Aggie Square project in Sacramento is moving rapidly. Part of this project will place new construction where the Med Center Fleet is currently located. Bryce Council, Assistant Manager of Parking and Transportation Services at Med Center, has informed us that they plan to relocate the shop and shut down the fuel station on May 31st, 2022. While this will cause inconvenience to some customers, I want to assure you that UCD Fleet vehicles will still be able to fuel using WEX fuel cards and at our Campus fuel islands.

This communication aims to make you aware of the changes and verify that you have a current WEX fuel card. The fuel islands at Campus Fleet will continue to offer Unleaded Gasoline and Renewable Diesel at a competitive rate compared to commercial fueling with WEX.

Please verify that you have a WEX card for each vehicle. Typically, the card is kept inside the colored pouch attached to the keyring. The card should look like the one below and has WEX printed on the front right corner.

If you have an old Voyager card or your WEX card is missing, don't hesitate to contact our Dispatch office. More information on this can be found on our website: [Fueling Services | Facilities Management \(ucdavis.edu\)](https://ucdavis.edu/facilities-management). The WEX acceptance locator link: [Discover Accepting Locations for WEX Fleet Cards | WEX Inc.](https://wex.com/locations) Med Center Fleet Services staff are available for any questions regarding Med Center vehicles.

Sincerely,

Fred Gallardo
Interim Director
Facilities Management Fleet Services
fjgallardo@ucdavis.edu

For comparison, on 4/22/22, Fleet Services Unleaded is \$4.96 while the average price in Davis is \$5.60 and Renewable Diesel is \$4.53 while the average price in Davis is \$6.28.
